EMERSON
Network Power
DISTRIBUTOR

Protecting You When All Else Fails

Surge
Defending power, voice, & data moving through the network against grid irregularities and dangerous electrical disturbances. To reduce downtime and extend critical equipment life.

DC Power
Unparalleled breadth of DC Power, distribution, control, and monitoring systems that dependably support today's voice and communications networks.

Outside Plant
Protecting and moving voice, video, and data from the central office closer to the subscriber. A full line of enclosures, cabinets, and shelters for integrated FTTN solutions.

Monitoring
Continuous oversight of data centers, computer rooms, and network closets, as well as wireless, wireline, and enterprise telecom applications.

Switching
Ensuring power continuity and control for sensitive communications and data processing electronics. Maintaining high 9's availability when using alternate sources of power.

AC Power
Sustaining critical operations that simply can't go down with a full range of Liebert UPS and integrated power systems. Keeping network closets to data centers up and running.

Cooling
Maintaining precise temperature control for optimal equipment performance with the most comprehensive range of integrated solutions. Keeping network closets to data centers up and running.

Services
The largest global services organization in the industry that delivers engineering, installation, project management, preventative maintenance, and energy-consumption monitoring.

Racks
Standard and customized integrated cabinet solutions that optimize technology & performance for the global IT and Telecom markets.
